Unexpected Order to Choose Hotel First

Two of participants will expect to see the flight first then decide the hotel or they would like to see them both in the meantime to get as much information as they can.

"I want to make sure the flight first then I can be more concern about the date and time. If I finished the choice for the hotel but I am not happy with my flight, it is annoying to restart from the beginning process which would make me want to quit"

Redesign -Follow the users' expectations

Show the Flight and Hotel both

- Show up the flight and hotel a the same time

- To avoid overwhelming information, hotel options can show up only some basic information for overview

- Allow users to "expand" if they want to browse only flight information or hotel information at a time
